

PGAdmin Error: The server could not be contacted

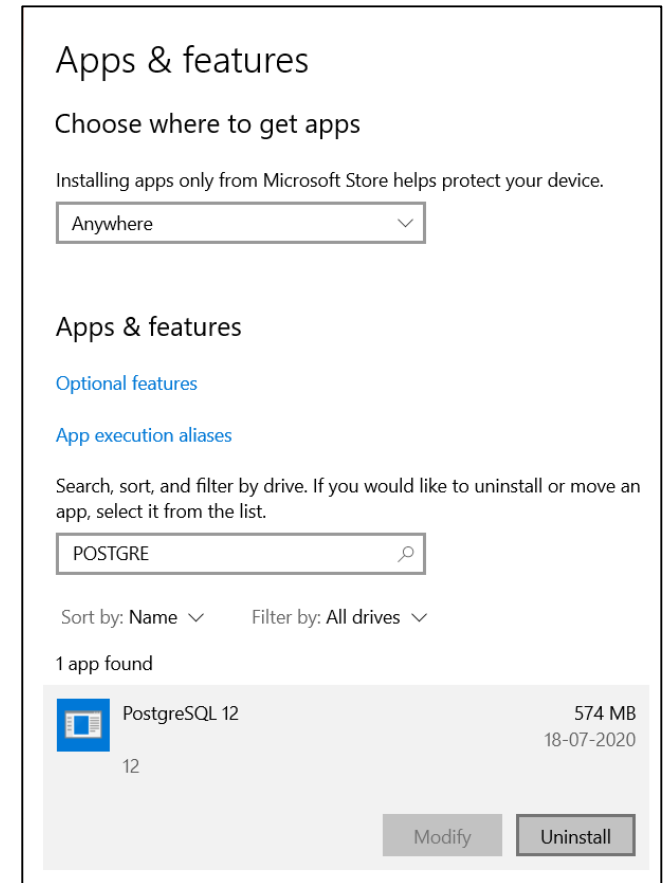

Possible solution for this error is uninstalling and reinstalling pgAdmin. Follow the below steps for the same.

Search for 'Add or remove programs' in search menu and open it

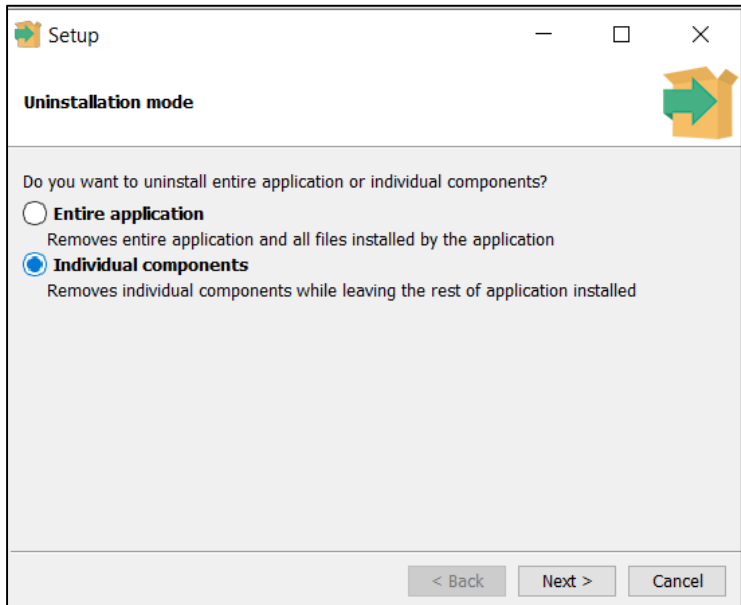

Search for 'POSTGRESQL' in the list of applications

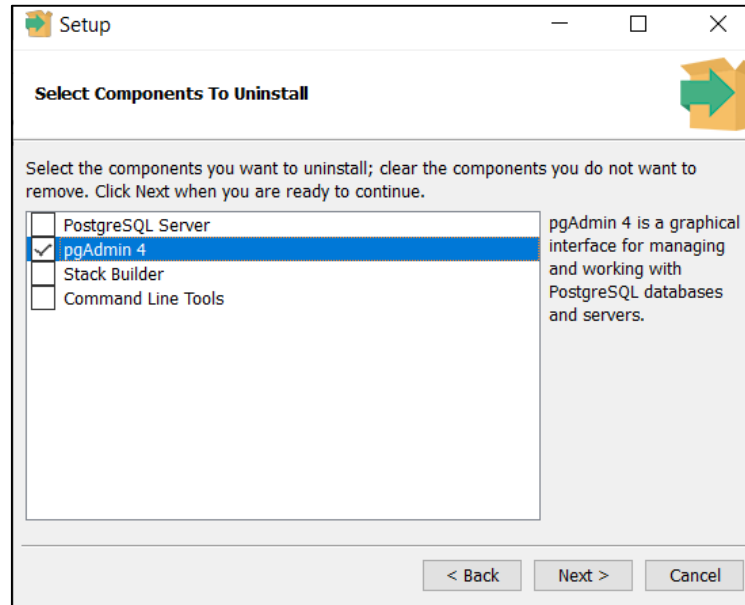

Select PostgreSQL application and click on Uninstall

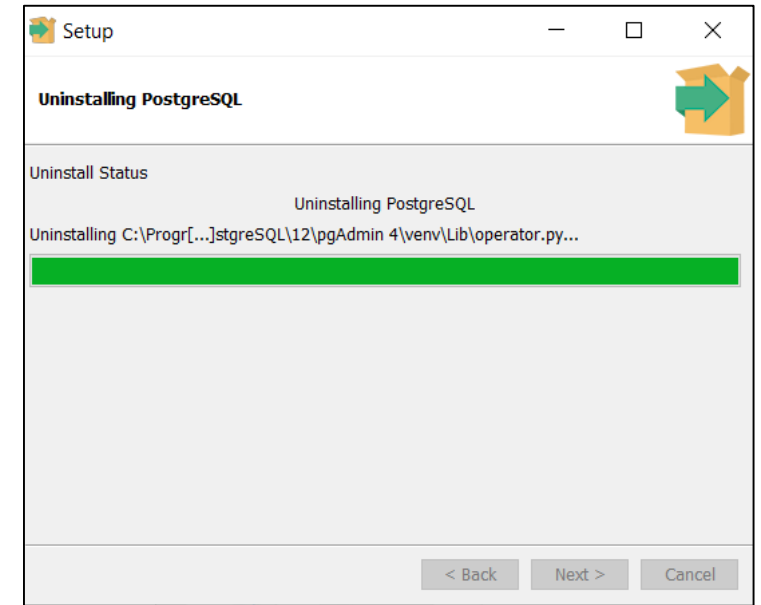

PGAdmin Error: The server could not be contacted

Select "Individual components" option here

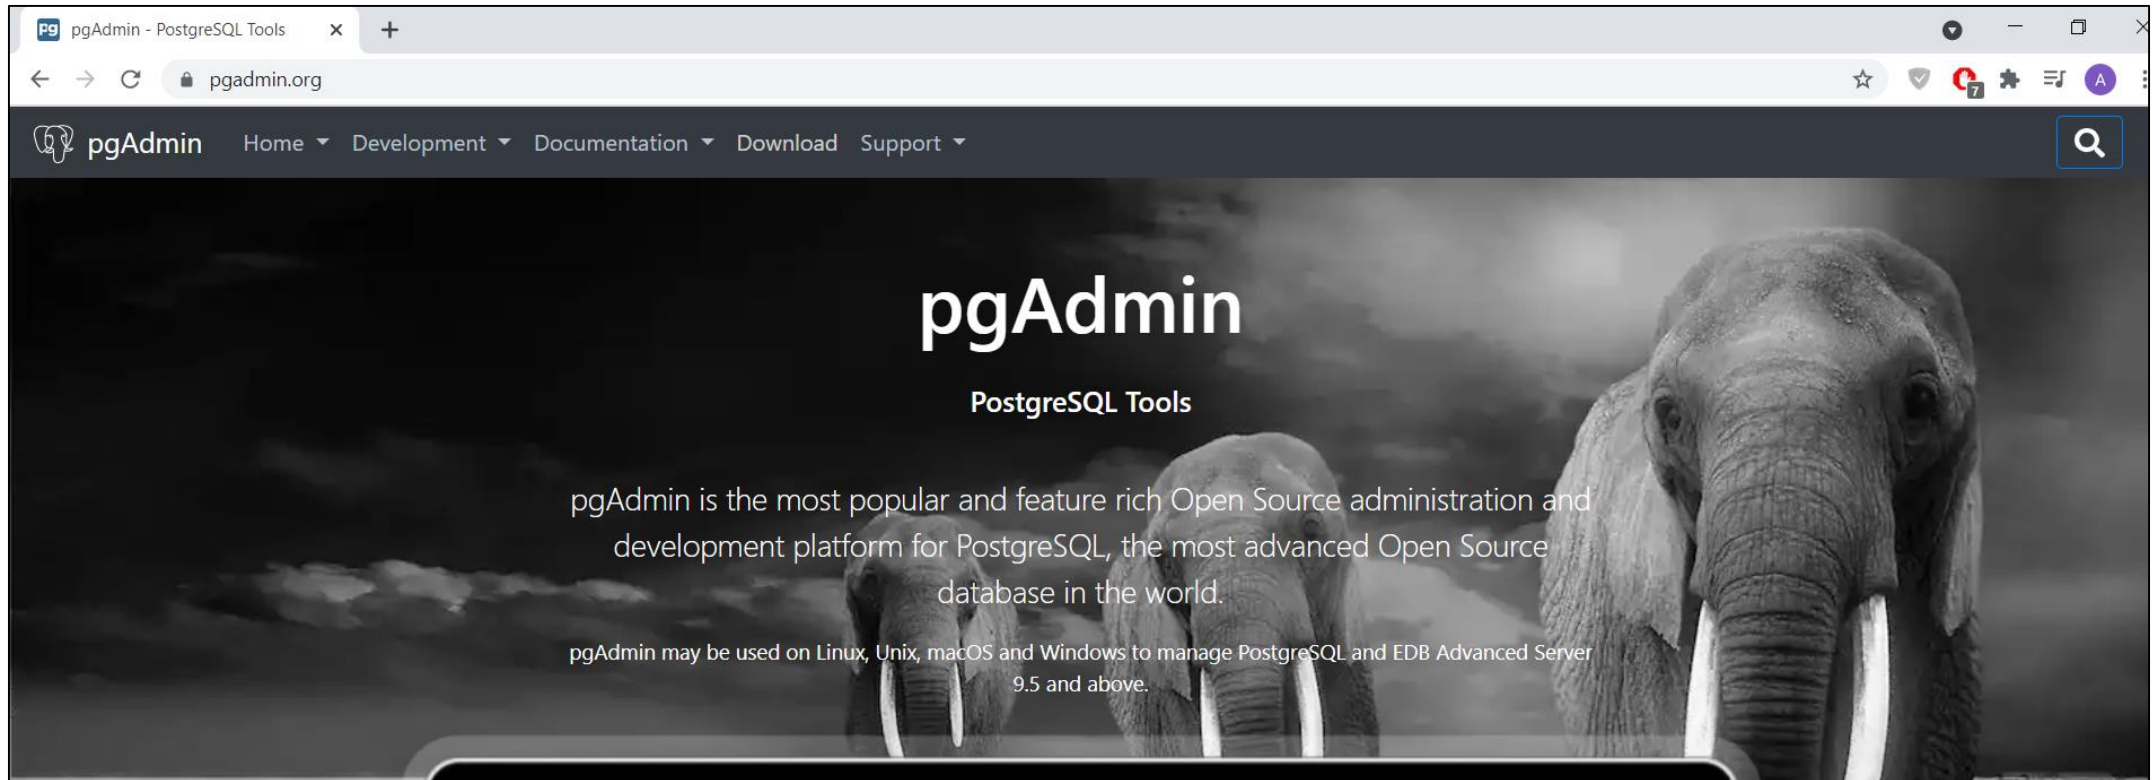

Select only pgAdmin here and click on next

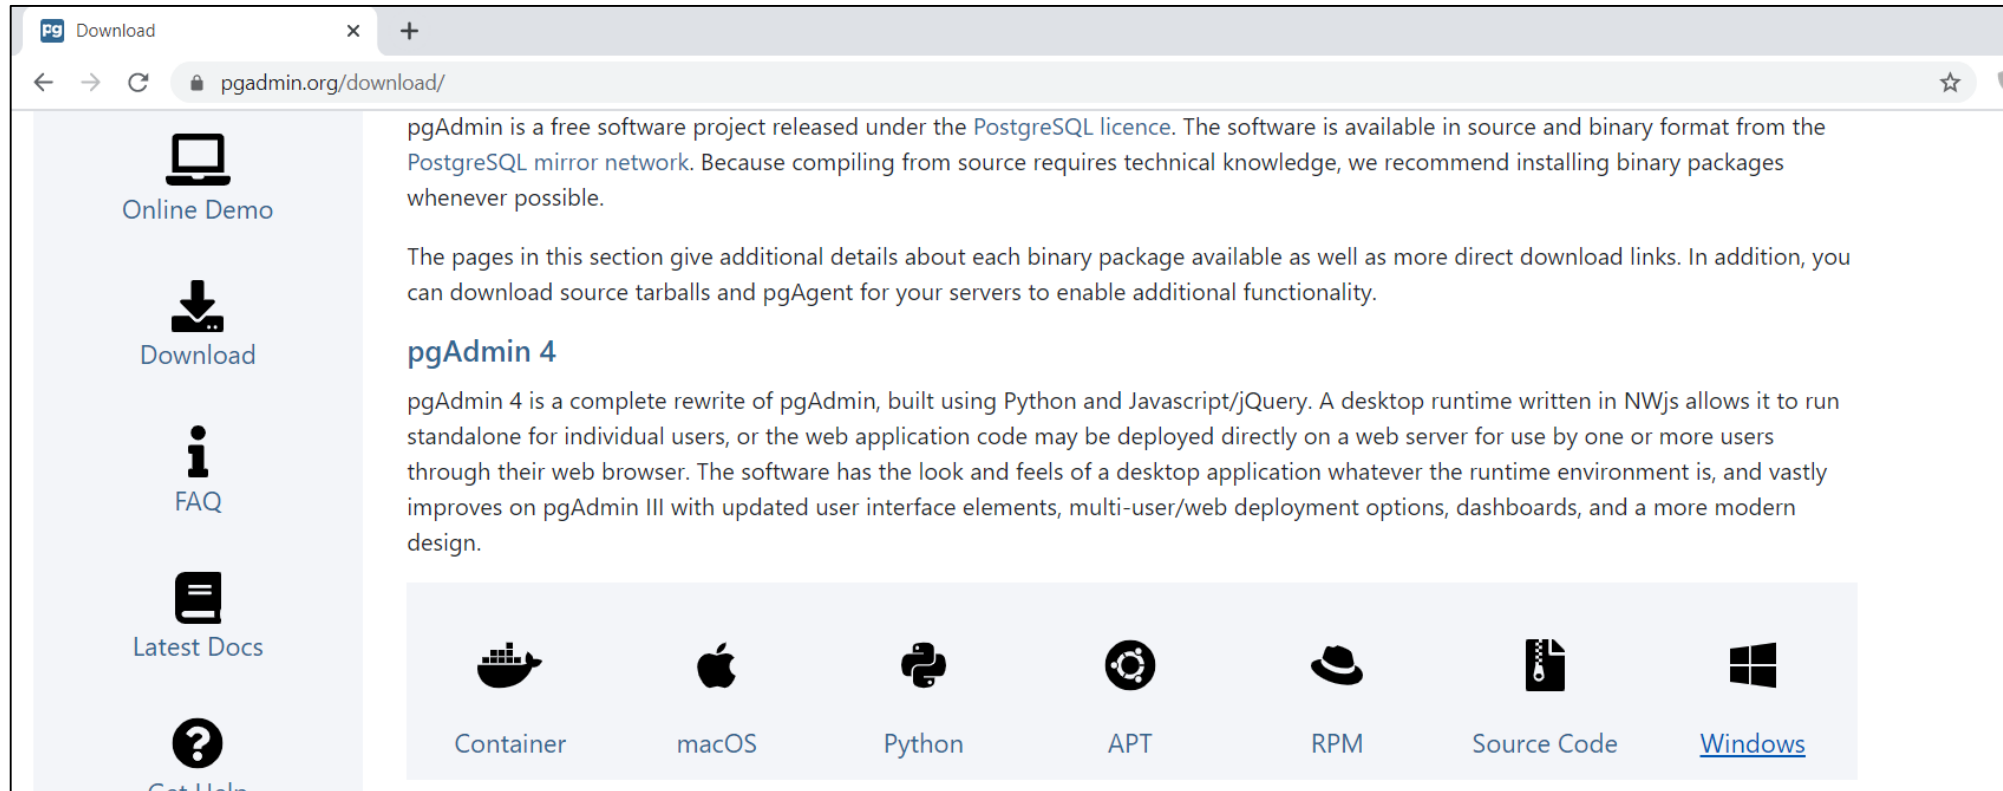

pgAdmin will be uninstalled from your system

PGAdmin Error: The server could not be contacted

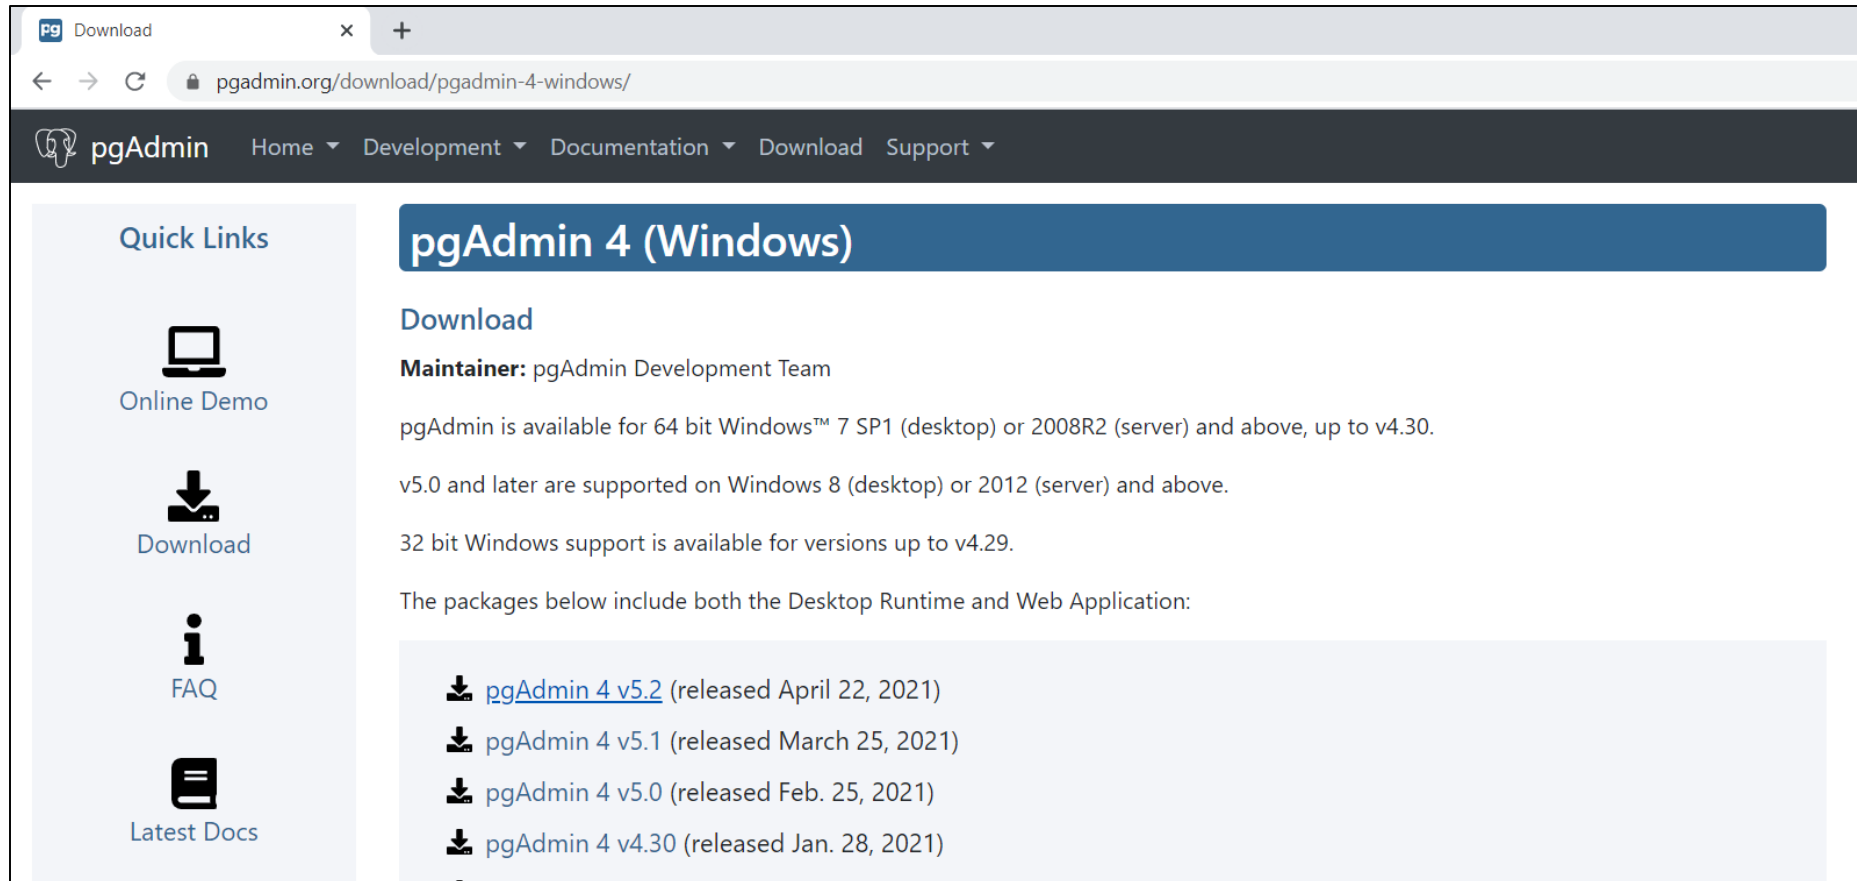

Open pgadmin.org on your web browser and click on the “Download” option on the top

PGAdmin Error: The server could not be contacted

On the downloads page, select your operating system

PGAdmin Error: The server could not be contacted

The screenshot shows the pgAdmin 4 Windows download page. The browser address bar displays 'pgadmin.org/download/pgadmin-4-windows/'. The page features a navigation bar with links to Home, Development, Documentation, Download, and Support. On the left, a 'Quick Links' sidebar includes icons and text for 'Online Demo', 'Download', 'FAQ', and 'Latest Docs'. The main content area is titled 'pgAdmin 4 (Windows)' and contains a 'Download' section. This section identifies the maintainer as the 'pgAdmin Development Team' and provides compatibility information for 64-bit Windows (7 SP1, 2008R2, and above) and 32-bit Windows (up to v4.29). It also states that the provided packages include both Desktop Runtime and Web Application components. A list of four download links is presented, each with a download icon and release date: pgAdmin 4 v5.2 (April 22, 2021), pgAdmin 4 v5.1 (March 25, 2021), pgAdmin 4 v5.0 (Feb. 25, 2021), and pgAdmin 4 v4.30 (Jan. 28, 2021).

pgAdmin 4 (Windows)

Download

Maintainer: pgAdmin Development Team

pgAdmin is available for 64 bit Windows™ 7 SP1 (desktop) or 2008R2 (server) and above, up to v4.30.

32 bit Windows support is available for versions up to v4.29.

The packages below include both the Desktop Runtime and Web Application:

-  [pgAdmin 4 v5.2](#) (released April 22, 2021)
-  [pgAdmin 4 v5.1](#) (released March 25, 2021)
-  [pgAdmin 4 v5.0](#) (released Feb. 25, 2021)
-  [pgAdmin 4 v4.30](#) (released Jan. 28, 2021)

Select any version, you can prefer the latest pgAdmin version.

PGAdmin Error: The server could not be contacted

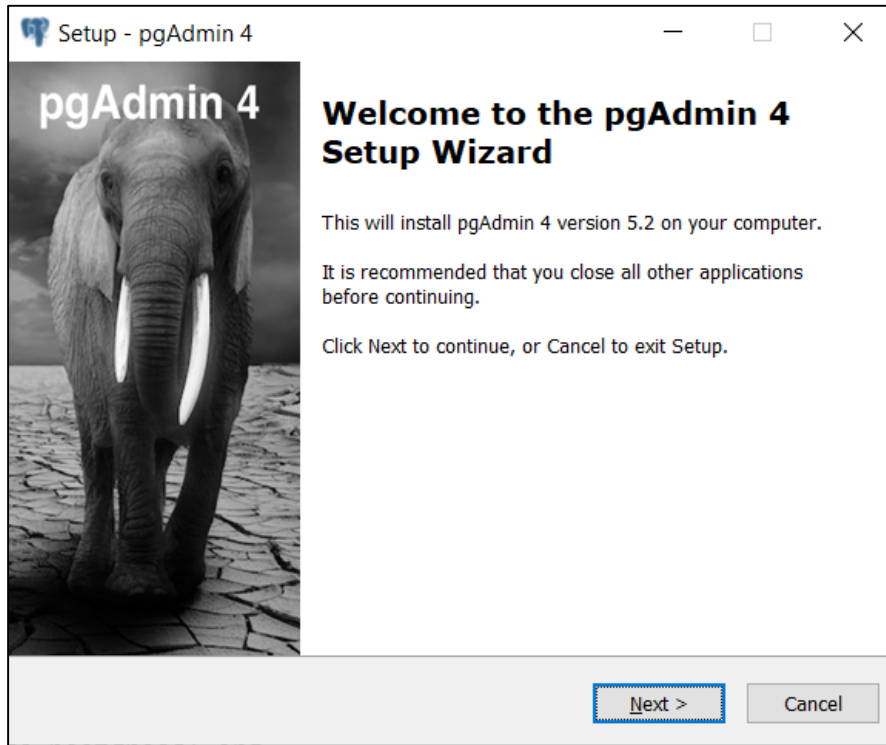

The screenshot shows a web browser window with the address bar displaying `postgresql.org/ftp/pgadmin/pgadmin4/v5.2/windows/`. The page features a navigation bar with links like Home, About, Download, Documentation, Community, Developers, Support, Donate, and Your account. A blue banner at the top of the main content area reads "13th May 2021: PostgreSQL 13.3, 12.7, 11.12, 10.17, & 9.6.22 Released!". Below this, the "Quick Links" section lists Downloads, Packages, Source, Software Catalogue, and File Browser. The "File Browser" section shows a breadcrumb trail: **Top** → **pgadmin** → **pgadmin4** → **v5.2** → **windows**. Under "Directories", there is a link for "[Parent Directory]". Under "Files", two files are listed:

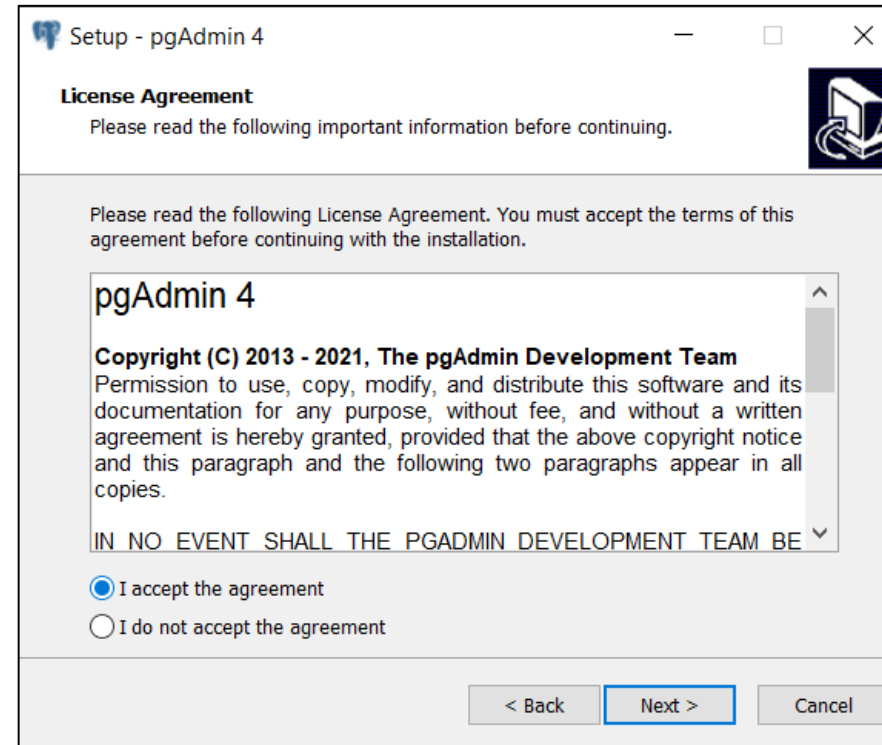

File Name	Modified	Size
CURRENT_MAINTAINER	2021-04-22 10:13:09	138 bytes
pgadmin4-5.2-x64.exe	2021-04-22 10:13:33	134.9 MB

Click on the .exe file to download it.

PGAdmin Error: The server could not be contacted

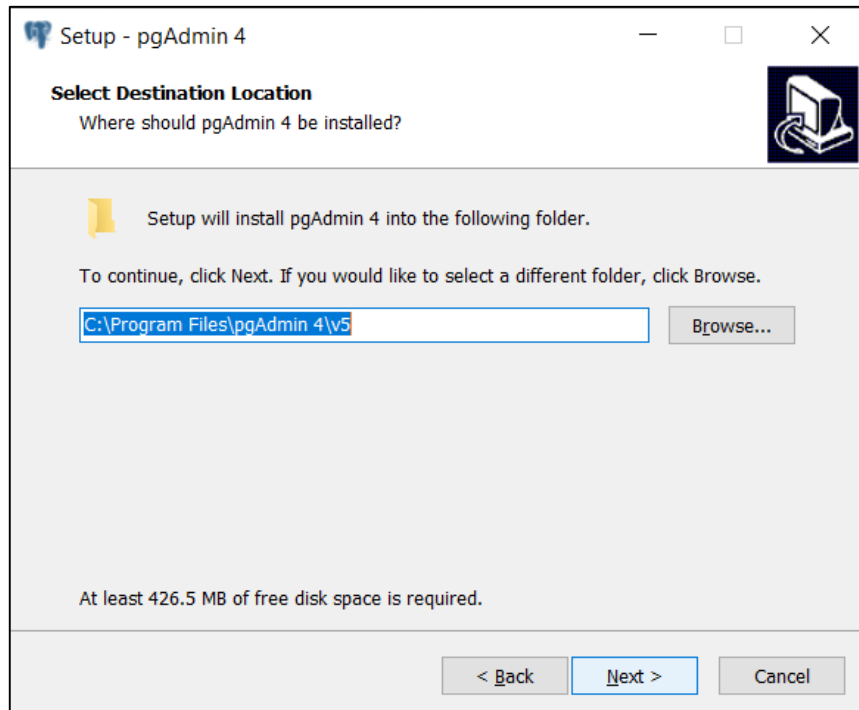

Run the downloaded file to start the installation

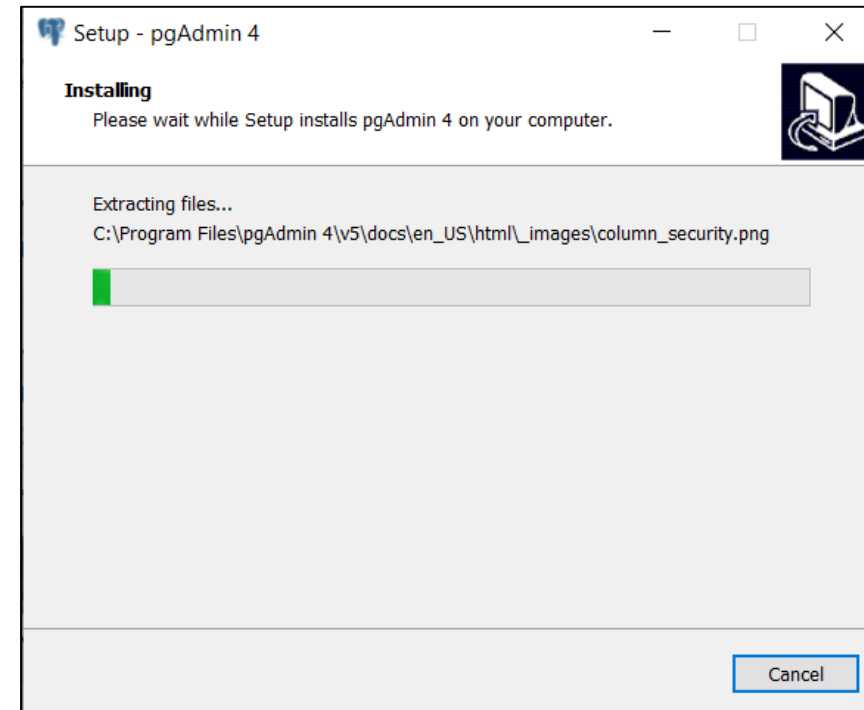

Accept and click on Next

PGAdmin Error: The server could not be contacted

Click "Next"

Once pgAdmin installs, open pgAdmin and enter password

Now, you should be able to access pgAdmin.
